

Moss Institute, Caldecott Motors KTM rider Jacob Williams 247 Is on his way back to the top

It was our club championship at the Horsham Motorcycle club last weekend, in practice Saturday Jacob blew his race bike up (Bottom end), the 09 KTM 85 has been our best yet, and had done 80 hours, luckily we had his 08 there to sell, the 08 is stock and in the 1st race he got 2nd, we then made a couple of suspension changes, the next 5 races over the weekend, he was unbeatable and I would say I have never seen him race so good, he smashed em with his unbelievable fast smooth style, and is now club champion in the 12 to under 16 85cc/150f BW class.

This is a big step forward for Jacob, after struggling with injury, starting the season with a broken wrist, and not being able to train at our home track, due to permit issues all year.

We are putting all our efforts into preparing for the 2010 season, Greg Moss of the Moss Institute, Jacob's coach, has faith that Jacob has what it takes to win championships in 2010, and has set us a program for the off season, to build the strength it will take to rise back to the top.

We would like to take this opportunity to thank all of our sponsors for your support throughout 2009. And look forward to your support in 2010.
